The Water Spout I Single Inline Top pump is designed for the field technician to build a complete Water Spout II. By simply connecting the Single Inline Top pump with the Two Bottom Booster pumps will produce a Water Spout II Complete Pump.

Then, simply connect the pump to a 12 volt battery to energize it. Its reliable design is suitable for continuous sampling or purging of ground-water wells.

The Water Spout I Single Inline Top Pump can pass sand, small rocks and debris without getting clogged or damaging the pump motors. It can run continuously without the need for a cool down and run dry for up to two hours without motor damage!

The Water Spout I Single Inline Top Pump has a 400 hour motor life and a sleek outside that minimizes well hang-ups. This pump is a very reliable and economical pump that provides a great bang for your buck!

**SPECIFICATIONS**
