- Applications

Principles of Operation

Upon inhalation, the air stream flows through the cartridges, which remove contaminants, so the wearer breathes in clean, fresh air.

Approvals and Standards

Requiring only routine filter replacement, the Comfo Classic respirator is approved by the National Institute for Occupational Safety and Health (NIOSH) for use against a variety of respiratory hazards. Use MSA Cartridge Service Life Calculator to establish a cartridge change and schedule.

Applications

Asbestos Abatement
Chemical
Construction
Electric Utility
Mining
Nuclear
Oil and Gas
Paper & Pulp
Sanding & Grinding
Spray Painting
Welding

Hazards

Particulate and Dust
Toxic Atmosphere Non-IDLH
Welding

Product Information

An improved version of the Comfo II respirator, featuring new SoftFeel® facepiece material, which increases the comfort factor dramatically. SoftFeel material is an exclusive new formulation that improves the pliability and softness of both Hycar rubber and silicone, the two facepiece materials available with Comfo Classic respirators. The Comfo Classic respirator features a unique face seal design that gives the wearer an exceptional fit.
